Non-Prescription Medicines	3
Roles and Responsibilities of School Staff	3
Parents' Responsibility.....	3
Long-Term and Complex Needs.....	4
Safe Storage of Medicines	4
Managing Medicines on School Trips	4
Policy Development and Review.....	4

Aims of This Policy Statement

- To support regular attendance of all pupils;
- To ensure staff understand their roles and responsibilities in administering medicines;
- To ensure parents understand their responsibilities in respect of their children's medical needs;
- To ensure medicines are stored and administered safely.

Where children are unwell and not fit to be in school, and where they are still suffering from an infection which may be passed to others, children should remain at home to be cared for and looked after. Even if they have improved, children may not return to school for at least 48 hours into a course of antibiotics.

The school is committed to ensuring that children may return to school as soon as possible after an illness, (subject to the health and safety of the school community) and that children with chronic health needs are supported at school. This policy statement sets out clearly a sound basis for ensuring that children with medical needs receive proper care and support in school.

Prescription Medicines

- Medicines should only be brought to school when essential (where it would be detrimental to the child's health if the medicine were not administered during the school day);
- All medicines should be taken directly to the School Office by a responsible adult and a Medicine form completed;
- Medicines will only be accepted in the original container as dispensed by a pharmacist and with the prescriber's instructions for administration;
- The medicine should be clearly marked with the child's name and Form number;
- The appropriate dosage spoon should be included with all medicines sent to school;

- The Medicine form and medicine will then be placed in the locked first aid cupboard near the kitchen for the class teacher to administer the medicine at the appropriate time. Any medicine that has to be kept in the fridge – this will be noted on the form. Any medicine which has to be returned home will be noted on the form. Any medicine administered will be recorded by the staff member on the Medicine form, they should have a witness to the administering of the medicine, who should also sign the form
- Medicines will only be accepted for administration in school on completion of the appropriate Medicine form by a parent. Once the period of administering the medicine has been completed, the form should be filed in the medicine cupboard. The form should remain in the school.

Non-Prescription Medicines

- We will not administer non-prescription medicines.
- We will not give liquid paracetamol routinely as their primary use is to control raised temperature for which a child should be at home; if we do give liquid paracetamol to a pupil during the school day then it will be noted in their Homework Planner or Reading Record and will also be recorded in the Medication File in the First Aid cupboard near the kitchen.
- We do allow cough sweets in school under the supervision of the staff.

Roles and Responsibilities of School Staff

- Staff at St Wystan's School are expected to do what is reasonable and practical to support the inclusion of all pupils. This will include administering medicines or supervising children in self administration. However, as they have no legal or contractual duty, staff may be asked, but cannot be directed, to do so;
- All medicines are stored securely in the locked first aid cupboard near the kitchen with access only for staff;
- Asthma reliever inhalers are kept in classrooms and are used under supervision of the staff. EpiPens are kept in the classrooms and taken by the pupil to break/sports lessons/off site.
- Staff must complete the 'Medication forms' supplied with the medication each time medicine is administered within school time; and on completion these are then kept centrally in the First Aid cupboard near the kitchen for easy access.
- Relevant staff will be trained on how to administer EpiPens.

Parents' Responsibility

- In most cases, parents will administer medicines to their children themselves out of school hours, but where this is not possible, parents of children in need of medication must ensure that the school is accurately advised about the medication, its usage and administration. Parents must complete the Medicine form kept in the office before a medicine can be administered by staff;
- Primary school children may be able to manage their own medication, under adult supervision but again, only with parental agreement given through the appropriate paperwork as above;
- Parents are responsible for ensuring that all medication kept in school e.g. asthma pumps, EpiPens, are kept up to date;
- Parents are responsible for notifying the school if there is a change in circumstances e.g. if a child is deemed to be no longer asthmatic by completing a new Medical Information Record

which will be sent home in the end of term mailing in July for the new academic year to ensure that all information is up to date.

Long-Term and Complex Needs

Where a child has significant or complex health needs parents should give full details on entry to school or as the child first develops a medical need. Where appropriate, a health care plan may be put in place involving the parents and relevant health care professionals.

Safe Storage of Medicines

The school is responsible for ensuring that all medicines are stored safely;

- Medicines should be stored in the supplied container, clearly marked with the child's name, dose and frequency of administration;
- Medicines are stored in the locked first aid cupboard near the kitchen under adult supervision or in the classroom in the case of asthma inhalers;
- Where medicines need to be refrigerated they will be kept in the kitchen fridge or in the fridge in the staffroom.

Managing Medicines on School Trips

On school visits the teacher is responsible for taking any class medication e.g. asthma pump, EpiPen, enzymes, eczema cream with them. They may agree to take temporary responsibility for administering medicine e.g. antibiotics following the above procedure. In addition, this must be itemized on the trip risk assessment.

Policy Development and Review

This policy document was produced in consultation with the school community, including school staff and Governors.

This document is freely available to the entire school community.

It will be reviewed on a policy rolling programme.
